

GENERAL SECURITY AWARENESS TRAINING

GSAT is a computer based course designed to provide General Security Awareness Training to airport personnel prior to issuance or renewal of their airport pass, as currently required by numerous regulators worldwide. The GSAT course content fully complies with the UK DfT requirement and EU legislation.

The course enhances the employees' awareness to security threats, the security measures taken in the civil aviation sector and to their role in maintaining security standards at the airport. GSAT comprises of 5 lessons and a final exam. Each lesson concludes with a review session to allow the trainees to practice their knowledge of the material covered in the lesson.

GSAT - A new addition to the  eagle family: GSAT is part of ICTS Europe Systems' Eagle – A Computer Based Training platform with a variety of courses designed specifically for airport security personnel.

GSAT COURSE TABLE OF CONTENTS

- GSAT - Lesson 1 - The Threat to Aviation
- GSAT - Lesson 2 - Objectives and Organisation of Aviation Security
- GSAT - Lesson 3 - Restricted Zone Protection and Access Control
- GSAT - Lesson 4 - Prohibited Articles
- GSAT - Lesson 5 - Your Role in Security
- GSAT - Knowledge Test
- Optional – Tailored airport specific training requirements (fire training, health & safety etc).

FUNCTIONALITY

- User Management Module – allows for creation and maintenance of user accounts.
- Reports Module – allows for retrieval of progress reports concerning the attendance and performance of each learner in the system, and also enables the printing of certificates.
- Authoring tools for updating and editing of contents
- Reports modules to monitor performance
- Interactive and multimedia-rich lessons to make the learning experience as engaging and enjoyable as possible.
- Lesson Customization to address the specific procedures at each airport such as levels of alert, badge colour coding, contact details of the security authorities, etc.

IMPLEMENTATION OPTIONS

- A complete package – ICTS Europe Systems supplies and installs both the hardware and the course content so they are ready to go
- Content only - Installation at the airport existing training facilities; either on a 'stand alone' PC or on a network.

KEY BENEFITS

- A four-hour classroom training can be shortened to a 90-minute computer-based self-learning programme
- Can be delivered at any time and at any location
- Optimise the learning experience using the most recent CBT methodology
- Easy adaptation of contents in case of regulation changes
- Multilingual support

ADDITIONAL COURSES
